

CLEAR-SQUALANE

Protective Antioxidant for audio equipment

Features

- Adopting high purity squalane (99% or more)
- No smell and no sticky transparent liquid
- Form an antioxidant layer lasting long
- Effective with a small amount of liquid
- Wide range of usage for audio equipment

Ingredients / Contents

Ingredients	Squalane (\geq 99% purity)
Contents	10 ml. (0.33 us fl oz)

What's "squalane"

"Squalane" is a hydrocarbon derived by hydrogenation of squalene (substance found in people, animals and plants). It has completely saturated chemical structure (molecular formula: C₃₀H₆₂) and is not subject to auto-oxidation. This product uses "99% purity of Squalane" which is achieved through the highly sophisticated refining technology.

Benefits

- Better sound effect by smoothing the surface of electrically conductive material without increasing contact resistance.
- Form an antioxidant protective layer which will last a long period of time.
- Applicable to the surface of audio equipment(metal, wood, plastic) for shining or glazing

Sample applications

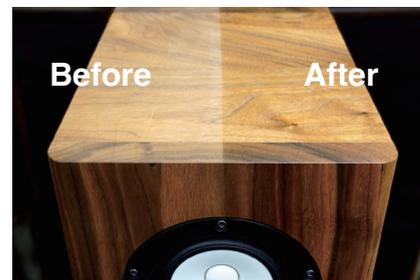

(Sample 1: Plugs)

(Sample 2: Tube pins)

(Sample 3: surface of audio equipment)

(REMARKS)

***This product is not cosmetic and is not for any human consumption.
